I'm a motion designer and art director with 20+ years across broadcast, VFX, branding, and interactive work. I've built visual systems for global brands, browser-native 3D products, and Web3 startups. At BBI Online I designed a data-driven asset pipeline that made multi-language delivery across 40+ markets five times faster with no quality loss, and led a team of four designers. I currently co-found and run product design at Tosee.art, building browser-native 3D with Three.js, WebGL, photogrammetry, and 3D Gaussian splatting. I work end to end: scripting, storyboarding, animation, compositing. I'm as comfortable fixing the pipeline as producing each pixel.

EXPERIENCE

Product Design / CTO & Co-Founder: Tosee.art · 2025|present

- Building a browser-native 3D platform that lets cultural institutions capture, distribute, and monetize photorealistic models of heritage sites without an application install.
- Working on pilots with the National Museum in Warsaw and the Royal Castle in Warsaw.
- Architected the pipeline from photogrammetry and 3D Gaussian Splatting to real-time WebGL delivery.
- Own product positioning, identity, interaction design, interface systems, and the operational capture-to-publication workflow.

Creator: Archiplayer · 2026|present

- Designed and built a local-first desktop browser and player for decades of WFMU radio archives.
- Shipped a Svelte 5, Tauri 2, Rust, and SQLite product with search, playlist-aware playback, favourites, history, offline downloads, and cross-platform release automation.

AI Training Data Expert: Micro1 · 2026|present

- Professional video annotation for a specialized AI training-data pipeline, applying twenty years of motion and VFX craft to expert-validated project work under NDA.

Design Operations Lead: BBI Online, via Lionbridge · 2017|2024

- Directed visual output for Ferrero Rocher, CAT, and Canon across concurrent EMEA and global campaigns in more than 40 languages.
- Designed a data-driven asset pipeline that made multi-language delivery five times faster without quality loss.

Art Director / Lead Designer: Insert Stonks · 2022|2023

- Concurrent with the BBI Online / Lionbridge contract.
- Defined the visual identity, UI/UX, marketing system, and flagship Road2Moon browser game, contributing to a successful \$500K seed round.
- Built an NFT processing pipeline for more than 10,000 assets and coordinated four designers on daily delivery.

Associate, ASSIST team: Marriott International · 2017|2020

- Supported service and information-system workflows during Marriott's integration of Starwood, concurrent with contract design work through Lionbridge.

Senior Graphic Designer: Agora Publishing, SVG Studio · 2010|2011

- Ran design and production for a 360-degree in-house studio spanning cinema, television, print, and digital.
- Managed cinema DPX delivery and DVD authoring pipelines on broadcast deadlines.

VFX / Motion Designer: Lightcraft · 2007|2010

- Produced VFX and motion graphics for television commercials and film-festival content, including daily broadcast spots for Gazeta Wyborcza.
- Animated and composited those spots in After Effects, and wrote the one-page PDF SOP that onboarded new editors onto a national TV commercial.

Freelance Motion & Visual Designer: Independent · 2004|present

- Delivered more than 100 projects across motion, VFX, branding, medical visualization, industrial design, events, and interactive work.
- Sole practice from 2012 to 2016 between studio roles: direct-to-client motion, VFX, and brand work. Continuous alongside every employed role since.

PROJECTS**Tosee.art**

Browser-native 3D platform for cultural heritage. Photogrammetry and 3D Gaussian Splatting to real-time WebGL, no install. Pilots with the National Museum in Warsaw and the Royal Castle in Warsaw.

tosee.art

Archiplayer

Local-first desktop browser and player for decades of WFMU radio archives. Svelte 5, Tauri 2, Rust, SQLite, with search, playlist-aware playback, offline downloads, and cross-platform release automation.

github.com/peqod/Archiplayer

Road2Moon

Flagship browser game for Insert Stonks. Visual identity, UI/UX, and an NFT processing pipeline for more than 10,000 assets. Contributed to a \$500K seed round.

Showreel

Twenty years of motion, VFX, and broadcast work cut to a single reel.

EDUCATION

Warszawska Szkoła Reklamy — Projektant Grafiki Użytkowej i Reklamowej, 2003–2006

SKILLS & TOOLS

Expert (10+ yrs): After Effects, Photoshop, Illustrator, motion graphics, compositing, VFX, brand identity, art direction, storyboarding

Strong (3–10 yrs): Blender, DaVinci Resolve, Fusion, InDesign, design operations, asset-pipeline design, UI/UX, design systems

Working (1–3 yrs): Three.js, WebGL, photogrammetry, 3D Gaussian Splatting, Svelte, Python scripting, video annotation

Familiar: Jira, GitHub, Draw.io, Affinity

LANGUAGES

Polish (native) · English (C1) · Italian (B2)
